PRESIDENT'S MESSAGE

Hello my friends and colleagues. I am very happy to report that our pharmacies are providing COVID-19 testing and COVID-19 vaccinations in full force. We dominate as independent pharmacies are delivering best services and reaching all populations of New York City offering testing and vaccinations. I am so proud to see how well we are performing at the top of our license when it most counts during extreme circumstances.

Pharmacies that are interested in COVID-19 testing

still have opportunities to start with Prescriptive platform. It is the easiest way to start testing where they help you set up with training, and help with a scheduling platform. You can go to their website at prescriptive.com and sign up.

CPESN USA opened a window of opportunity for pharmacies that want to sign up with a Federal Pharmacy Partner as a network administrator for CDC COVID-19 Vaccination Program. You can be a State partner as well as have one Federal partner for COVID-19 Vaccine administration. You can reach Roger Paganelli: bigrogpags@aol.com or

How To Survive A DEA Inspection Series: Why You Should Keep A Complete And Accurate Inventory of Schedules III Through V Controlled Substances[©]

Most pharmacists did not realize that the Drug Enforcement Administrative (DEA) last year revised their Pharmacist's Manual which is about 131 pages. Why I say this? Because I speak with independent pharmacy owners and staff pharmacists and this is the first question I ask them when they call for advice.

I know that the DEA regulations are clear that the inventory of Schedule II must be exact while Schedules III through V can be estimated provided that the container has no more
