

Provide long-term-care support services with patients living at home in your local community with the support of CPESN® LTC@Home.

CPESN LTC@Home provides your pharmacy with the education, compliance and accreditation guidance to engage in reimbursable CMS long-term care services for eligible patients. CMS has created criteria for senior patients who reside in their homes as eligible to receive the same reimbursable Medicare benefits as those patients who reside in a CMS-accredited senior community. LTC@Home helps you build and grow this segment of your pharmacy business through existing workflows while qualifying for higher reimbursements, and strengthening relationships with local prescribers. Through documentation of patient services, pharmacies demonstrate their high-performance and readiness to participate in value-based care programs for eligible long-term care patients.

Now is the time to leverage long-term care opportunities and increase pharmacy revenue as part of the high-performing CPESN Special Purpose Network - LTC@Home.

AFFILIATE TODAY
