CPESN® Medical Billing

Your CPESN-trusted medical billing support services customized to your state's specific opportunities and landscape

CPESN Medical Billing empowers participating pharmacies to take back the pharmacy on the horizon of billing medical claims with support services tailored to state-specific regulatory requirements and level of payer opportunities. Pharmacies participating in the special purpose program pay for only what they need, closing the gaps in current medical billing processes. Community pharmacies set standards for technology solution providers, and design best practices for clinical service delivery and emerging value-based opportunities, ultimately being equipped for revenue cycle management as they add medical services to their traditional dispensing workflows.

Benefits to CPESN Pharmacies

- Luminary-led market assessment provided by PharmFurther
- Up to three levels of support, starting with the local Managing Network Facilitator
- Medical billing education, resources for the Managing Network Facilitator
