Build a pharmacy-integrated medical clinic in your community.

communityhealth@cpesn.com

Benefits to Pharmacies

- Increased Foot Traffic: With a clinic integrated into the pharmacy, customers will visit regularly for both their pharmacy services, medications, and primary care needs
- Enhanced Patient Relationships: By providing a broader range of services, you can build stronger relationships with patients, which can lead to increased loyalty
- Data Integration: Access to comprehensive patient data from both pharmacy and primary care services can improve treatment outcomes and operational efficiency
- Community Impact: Positioning the pharmacy as a central healthcare hub can strengthen its role in the community, enhancing its reputation and customer

Requirements

- CPESEN USA member in good standing and affiliated with a local network

Cost

Subscription is included under CPESEN participation fees

Providing local pharmacy care support services for your patients living at home.

PCaH@cpesn.com

Benefits to Pharmacies

- Increased Profit: Boost revenue through higher reimbursement from payers recognizing this higher level of care and reduce your cost of goods through valuable buy-side opportunities
- Secured Patient Base: Retain your in-home seniors and other special needs patients as competitors develop at-home services
- Value-Based Care Opportunities: Position for value-based care arrangements with reimbursement linked to patient outcomes through CPESN
- Improved Workflow and Efficiency: Incorporate shared best practices for more efficient operations and better use of pharmacy staff

Requirements

- CPESN USA LTC NPI in good standing and affiliated with a local network

Cost

Pharmacy Care at Home program is currently included under your CPESN LTC NPI participation fee of \$95

Enabling revenue sharing through a new model of physiatry collaborative care.

ppc@cpesn.com

Benefits to Pharmacies

- Lead in the delivery of long-term and in-home care focused on patient frailty, mobility, and patient empowerment
- Leverage pharmacist collaboration with physiatrists—whole-person focused physicians trained in leading treatment and rehabilitation care for aging, disabled, and other high-risk patients
- Unlock new revenue stream opportunities within a growing \$265/B industry
- Management Services Organization (MSO) support for your pharmacy's selection and adoption of the collaboration model that suits your market
 - Identify and introduce physiatrists to pharmacy practice to support primary care
 - Access tech-enabled resources to help patients better self-manage at home

Requirements

- CPESN USA member in good standing and affiliated with a local network
- PPC@Home participating pharmacies must be able to provide, execute and complete effective medication management services including MTM, Medication Reconciliation, Transition of Care Management, and consulting services among others, and deliver, offer to deliver, or provide some means to be able to address patient needs directly at home.

Cost

Model varies with state laws regarding medical practice ownership.
