*After a TSP has been recognized by CPESN USA with eCare Plan Functionality for at least one year, the TSP must have a minimum of 10 Pharmacist eCare Plans by at least one CPESN Pharmacy NPI in the most recent full calendar year to continue to be recognized as a CPESN-approved TSP with eCare Plan Functionality. A TSP may work with CPESN Staff to become activated or re-activated as a CPESN-approved TSP with eCare Plan Functionality and have CPESN Pharmacy users again. In addition to the requirement that a TSP must have at least one CPESN Pharmacy NPI submitting 10 eCare plans within six months of re-activating, the Technology Solutions Provider must demonstrate that it intends to continue to market and deploy eCare Plan Functionality as part of its overall go-to-market strategy.

CPESN USA does not receive any revenue from any TSP under CPESN USA's Industry Initiatives program for name, image, likeness or endorsement. All TSPs listed here meet the requirements for capabilities and collaboration determined by each respective Initiative lead and CPESN Luminary owners and subject matter experts who inform the criteria for required capabilities and collaboration.

Note. In the spirit of full disclosure, CPESN USA does receive sponsorship dollars from time to time to support attendance at the CPESN Mid-Year Leadership. For the calendar year 2026, the TSP is RedSail Technologies.
